Trans. of Zhurnal Nauchnoi i Prikladnoi Fotografii i
Kinematografii (USSR) 1960, v. 5, no. 3, p. 221-225.

DESCRIPTORS: Electric diffraction analysis, *Photo-
graphic emulsions, *Beta particles, Infrared images,
Optical images, Temperature, Ions, Ionization.

The relationship between the reciprocity effect and
temperature, which is of special importance for the
fading process, was investigated. Results showed that
the activation energy determined in the case of the ef-
fect of ionizing particles by the isodensity curves, can
be used as a measure of dispersion of the latent image.
